

VISION

Marine Version

The Marine version of the Retigo Vision combi oven differs from a standard combi oven by its equipping with several safety elements, which are designed to provide safe operation in a galley located on a vessel, an oil rig or in operations with similar operating conditions.

SAFETY ELEMENTS OF THE MARINE VERSION

SPECIAL DOOR PISTON

preventing the door from opening when the combi oven becomes tilted at an incline.

MODIFIED TRAY HOLDERS

protecting against sudden sliding out of gastronorm container from the combi oven, from the stand ST 1116, ST 623 or from the loading trolley VO 2011 R

FIXED ANCHORING OF LEGS

to the combi oven stand and the stand legs to the floor preventing unwanted movements.
